WSD 71

New WSD 71

Light, Agile, Stable

Weller®

Product Benefit

- Easy handling by operators
- Quick temperature ramp up, 40% faster
- Sensitive temperature reaction, quickly temperature recovery make high heat efficiency.
- Robust Heating element for long time using
- Lower temperature at iron handle for operator holding.

Product Function

- LED display, Button setting for temperature
- Password setting protect the operation temperature
- Temperature offsetting can be adjust by buttons
- ESD compliance
- ESD auto-checking and alarming
- Meet with IPC request
- Soldering tip: MXT tips

Application

- For small/ middle soldering joints soldering and reworking
- A whole series soldering tip for different components application.
- PCB board assembly and rework
- Easy for operation and handling
